Innovation Society Today

Perspectives, Fields, and Cases

- Innovation - theory and history of the trigger of societal transformation
- Study about the society's relationship with innovation
- International and interdisciplinary

The book offers new theoretical perspectives on innovation, analyzes innovation processes in diverse innovation fields, and presents case studies that reflect the diversity of innovations fields. To what extent and in what sense does innovation characterize our societies today? Innovations are no longer limited to the economic sphere; we find them in almost all areas of society today. Diverse actors generate innovations in different, increasingly reflexive ways. New concepts, practices, and institutional forms such as open source, crowdfunding, or citizen panels expand the spectrum.
